

### **LAND AWAY FROM NAMED LOCATIONS (AT FIRST)**

Just like in PUBG, there is no tutorial teaching you how to play the game and the lobby has very little time to practice. You will have to do most of your learning process during a live match. Try landing in remote places where you feel comfortable with the controls before you fight. If you feel like a battle early in the game, go to the mainland at Tilted Towers. It is total madness and because of this no one will be using their building skills.

If you play on a computer, you can cut a few keys and learn about the development mechanisms. Just do that somewhere quiet and peaceful. This also ensures that you do not meet another person and return to the lobby in the first minute of the game.

### **HIT THE GROUND FASTER**

In free autumn, try to keep your character in a small corner, not down, and wait for your sailboat to develop automatically. The goal is to reach the landing point from the shallow point instead of directly. There must be a good distance between you and the desired location when the pointer is opened so that it moves horizontally in the direction of the sailboat. If you are trying to go with your glider in the place, you will need to slow down and gain a weapon for yourself. However, the fastest way to the ground is to jump over the ocean. Your paragliding takes place a lot later and you have to keep your character above the water. Then you can go to the ground and start from a distant point.
